Dear Hiring Manager,

As a new challenger entering the software development world, I can't wait to discover what I will learn next. I am seeking a fulltime position to help me achieve that goal. Software development started out as a hobby for me and slowly developed into a career path that I wish to actively pursue. Software development has opened a door for me that has led me to many curious encounters which bring me joy trying to untangle.

Seneca has provided me with theoretical and hands-on experience which has led me to creating quite complex applications. These applications range from the simplest "Hello World!" to full-stack websites. Not only that but Seneca has also provided me with the knowledge and expertise of developing projects in many languages and framework in a team environment using git version control. As well as theory in many important concepts of programming such as OOP concepts, data patterns and algorithms, networking, programming principles and databases to name a few.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your company are:

- I am a self-driven analytical thinker able to work in a fast environment with a problem-solving mind and need to set SMART goals weekly to increase productivity
- Strong understanding of software development life cycle and project management processes
- Experience with Windows, Linux operating system and virtualization tools such as VMware
- Strong coding skills in a modern object-oriented language, algorithms and data structures
- Solid foundation in API's and strong analytical and debugging skills
- Experienced with testing methodology, web technologies for instance Node.js and frameworks like Express, different programming languages, databases, RESTful services, version control software like Git, design techniques and tools
- Experienced with agile development, Java, SQL queries, relational and non-relational databases, IOT, writing SQL queries in Oracle and Microsoft SQL Server
- Experience working with front-end framework and libraries, for example ReactJS, Angular, jQuery and Bootstrap and in the concept of UI/UX design

I would greatly appreciate the opportunity to have an in-person interview with you to further discuss my skills and qualification in more detail, as well as to address any question you may have for me. I would like to thank you for your time and consideration.

Sincerely,
Manan Patel

EDUCATION

Seneca College - Bachelors of Software Development

January, 2018 – August, 2021

- Achieved outstanding results in all programming courses such as C, C++, Database, Algorithms and Data Structure, web development, etc.

HIGHLIGHT OF QUALIFICATIONS

- Communicate effectively
- Problem solver, strong critical-thinking skills
- Team player
- Detail oriented
- Responsible and dependable
- Efficient in multitasking
- Well-versed with current and upcoming trends in the tech industry
- Excellent performance in the sciences
- Work well under stress
- Highly motivated
- Leader
- Creative

TECHNICAL SKILLS

Efficient and knowledgeable working with:

Programming Languages:	C, C++, C#, Java, SQL, PL/SQL, JavaScript, TypeScript, HTML/CSS, Python
Frameworks:	Angular, ReactJS, React Native, NodeJS, ExpressJS, .NET
Databases:	MongoDB, SQLite, PostgreSQL, SQL Server, MySQL
Other:	Git, Agile, RESTful APIs/AJAX/JSON, jQuery, SOAP, MVC, Linux, Unix, Android and Cross Platform Development, White & Black Box Testing

TECHNICAL PROJECTS

Capstone Project – Realtor Website

May, 2019 – April, 2020

- Designed and Developed a MERN web-based application for real estate sellers and buyers to post and search for properties to sell or buy.
- Integrated Speech-to-Text technology to render the search of properties for buyers for a more efficient way of searching and navigating the site.
- Users are able to create accounts on the website to save previously searched history as well as list their own homes.

WORK EXPERIENCE

TANGERINE – SERVICENOW DEVELOPER/ADMINISTRATOR

SEPTEMBER 2020 – APRIL 2021

- Designed, developed and tested new features heavily on the change management, incident and request forms to increase efficiency and accuracy in addition to meeting the needs of the business.
- Resolved 152 incidents and requests tickets in my third's month alone which included major and minor bug fixes, requirement gathering, analysis, creating, updating, reviewing or deleting existing items, features and workflows.
- Supported in the integration of Microsoft SCCM, Dynatrace and SolarWinds with the ServiceNow platform as well as writing up documentation.
